Adobe LiveMotion 1.0 Beta

Take your Web sites to a whole new level with Adobe® LiveMotion™ Whether you're designing interactive graphics or engaging animations, LiveMotion delivers the intuitive tools you need to create dynamic Web content with ease. And when you're finished, output your compositions to a variety of vector-based Web file formats, including SWF.

Install Adobe LiveMotion Beta

Features

Productivity

- Object- based Timeline modeled after the Adobe After Effects timeline
- Non-destructive Authoring environment - each layer has its own opacity mask
- Ability to animate an attribute(s) of an object and save as a style which can be applied to another object(s)
- Familiar, intuitive Adobe user interface
- Multiple, pre-scripted behaviors included

Integration

- Support for native Adobe Photoshop and Adobe Illustrator layered files
- Ability to convert layers to individual objects and animate each layer as a separate object
- Seamlessly update Photoshop and Illustrator files within a LiveMotion composition

Creativity

- Integrated content creation tools including Bézier Pen tool, motion path, and non-destructive Photoshop shop filters
- Support for steaming sounds with volume, pan, trim and loop controls
- Color schemes picker
